EXPERIENCE

AI Engineer Intern

Inosens

Sep 2025 – Jun 2026 · Istanbul, Turkey

- Analyzed physiological signals from wearable ECG devices using NeuroKit; conducted technical evaluation meetings with an international manufacturer and reported data quality issues.
- Modeled 2 years of production data from a yarn factory using ARIMA, SARIMA, and Prophet; built a decision support system for future production forecasting.
- Developed a stress detection model using synthetic data generation on physiological gaming data.
- Contributed to *"Use of Machine-Learning Methods to Develop Stress Detection Model Using Expanded Dataset"* (under review).
- Conducted dataset expansion in a MediaPipe-based video motion classification project.

AI Engineer Intern

Imona Technologies

Apr 2025 – May 2025 · Istanbul, Turkey

- Developed social media content automation using Make.com and AI agent integrations.

Computer Vision Engineer

BAIBU Venator UAV Team

2023 – 2025 · Bolu, Turkey

- Developed a real-time fire detection model using YOLO and CNN architectures.
- Performed integration and optimization for low-latency inference on Raspberry Pi.

TALKS

Set Up a Workflow with the AI Agent

Bolu Abant Izzet Baysal University

May 2026 · Bolu, Turkey

- Delivered an open lecture on AI fundamentals, prompt engineering, tokens, APIs, and AI Agent architecture to a university audience. Academic advisor: Dr. Sibel Cansu.

PROJECTS

Personal AI Portfolio Website

- Built and deployed a personal portfolio website showcasing AI/ML projects, featuring an integrated RAG-based chatbot built with LangChain. (Link)

ABOUT

Mathematics graduate; developed RAG-based LLM systems using LangChain and LangGraph, production-level time series forecasting models using ARIMA/SARIMA/Prophet, and real-time computer vision solutions using YOLO and MediaPipe. Implemented physiological signal analysis using NeuroKit, low-latency inference optimization on Raspberry Pi, and stress detection modeling using synthetic data generation. An academic paper on stress detection is currently under review.

LANGUAGES

Turkish — First Language

English — Professional Working Proficiency

SKILLS

Python · LLMs · RAG · YOLO · Polars · OpenCV · PyTorch · LangSmith · LangGraph · Scikit-learn · TensorFlow · MediaPipe · Transformers · LangChain · Fine-Tuning · Feature Extraction · Machine Learning · Git · Deep Learning · Time Series · AI Agents

COMPETITIONS

Zindi / Amini Cocoa Challenge

- **7th Place** – Computer Vision

BTK Datathon 2024

- **79th / 354** – Machine Learning

PUBLICATIONS

- *"Use of Machine-Learning Methods to Develop Stress Detection Model Using Expanded Dataset"* – under review

EDUCATION

BSc. Mathematics (English Program)

Bolu Abant Izzet Baysal University

2021 – 2026

GPA: 3.09 / 4.00
